

Osterhaus receives profession's highest honor

Robert J. Osterhaus ('52 B.S.) is the recipient of the 2005 American Pharmacists Association (APhA) Remington Honor Medal, the profession's highest honor.

The Remington Honor Medal, named for eminent community pharmacist, manufacturer, and educator Joseph P. Remington (1847-1918), was established in 1918 to recognize distinguished service on behalf of American pharmacy during the preceding year, culminating in the past year, or during a long period of outstanding activity or fruitful achievement. The award is presented at the APhA Annual Meeting and Exposition, which this year is in Orlando, Fla. From April 1-5.

For more than 50 years Osterhaus has been an instrumental and influential leader in the pharmacy profession. He began his pharmacy career at Kouba Pharmacy in Anamosa, Iowa. In 1965, he went on to practice in his own pharmacy, Osterhaus Pharmacy, located in Maquoketa, Iowa, for more than 30 years.

In addition to caring for patients, he has worked tirelessly to promote the value of the pharmacist's role in patient care at local, state, national, and international levels and in serving the needs of his community. Under Osterhaus' leadership, the Iowa Pharmacy Association (IPA), the University of Iowa College of Pharmacy and the Drake University College of Pharmacy and Health Sciences collaborated to form the Iowa Center for Pharmaceutical Care to help facilitate the transition of pharmacy practices in Iowa to a pharmaceutical care based model. A strong believer of pharmacists' involvement in community and the political process, Osterhaus served as an elected member of the Iowa House of Representatives from 1996-2004.

Robert Osterhaus

Osterhaus has served as president of pharmacy organizations in Jackson and Dubuque counties. He also served on the Iowa State Board of Pharmacy, including two years as Chair in 1976 and 1977. An active member of IPA, he served as president, speaker of the house, chairman and on numerous committees and taskforces. On the national level, Osterhaus served as trustee and later as President of APhA from 1992-93. A long-time advocate for pharmacy education, he served as a board member of the Accreditation Council for Pharmacy Education (ACPE) from 1990-91, and from 1996-2002. He went on to serve as ACPE president in 2000 and 2001. He also served the profession

as a member of the Federation Internationale Pharmaceutique Community Section Executive Committee from 1995-1997.

In describing Robert Osterhaus' contributions to the pharmacy profession, one of his nominators stated, "his dedication to professional growth, his personal integrity and his tireless resolve to advance the role of the pharmacist in the health care system are indeed significant and unparalleled."

The APhA is dedicated to improving medication use and advancing patient care. Founded in 1852 as the American Pharmaceutical Association, APhA is the first-established and largest professional association of pharmacists in the United States. Its more than 50,000 members include pharmacists, scientists, student pharmacists, pharmacy technicians and others interested in advancing the profession.

Matt Osterhaus meets with visiting faculty from Kyoritsu University of Pharmacy, Tokyo, Japan. He is also the recipient of an APhA award, see page 5.

Accountability ...

As I reflect on our progress over the past six years and our aspirations for the future I am struck by how much more complex the expectations are these days for individuals and organizations in all areas of business, education and life. Resources are tighter for both government and corporations, the population continues to age, portending major pressures on all of our systems including education and health care, and taxpayers, parents, students and customers of all types are demanding more accountability than ever before.

Dean Jordan Cohen

We have recently concluded a very successful self-study and reaccreditation process with the Accreditation Council for Pharmaceutical Education and are now in the process of finalizing a self-study for the periodic collegiate review of our graduate and research programs. Both of these activities allowed us to critically examine our strengths and develop a plan for improvement, which in the case of our Doctor of Pharmacy program involves introducing an **assessment** of our graduates' knowledge and skills as a measure of the quality of our program. This has become a major trend in university and college accreditation and we have asked Professor Hazel Seaba to take on a new role as assistant dean for curriculum and assessment to ensure our continued improvement in these efforts. Our overriding priority is that we prepare our graduates not only to practice a high level of patient care today, but also to be agile and self-motivated enough to respond to countless unforeseen changes in health care, technology and economics. Another benefit to this approach to evaluation is that if we are circumspect in assessing our own strengths we begin to develop a continuous improvement paradigm for our curriculum and program.

The same challenge applies to our graduate programs as the entire drug discovery and development model is changing rapidly due both to regulatory oversight issues as well as advances in biotechnology. That means that we are more accountable and have to hold ourselves to a higher standard of documenting our outcomes than ever before.

The last major area of accountability that I felt I needed to bring to your attention is the growing interest on the part of the legislature and Regents for our performance as an institution. As funding for publicly funded higher education gets tighter, there are expectations for increased efficiency and productivity that result in more accountability for all of us — administrators, faculty, staff, and students alike. There is also a renewed need to develop revenue sources to support our programs beyond the state. The Board of Regents, State of Iowa has proposed to the governor and legislature a very novel proposal for adequate state funding to enable us to maintain our margin of excellence and our rightful place in the Big 10. In order to achieve this we will need to show them, the legislature, and ultimately the people of Iowa, that we are indeed accountable and willing to examine new, more efficient methods of teaching, doing research and providing service while being true to our mission. I believe we are up to the challenge and hope that you, too, will better understand our new environment.

Honors & Awards

Wiederholt Award: Barry Carter, Ph.D., professor of clinical and administrative pharmacy, and Elizabeth Chrischilles ('79 B.S., '81 M.S., '86 Ph.D.) UI professor of epidemiology, are the 2005 recipients of the American Pharmacists Association's Wiederholt Prize for Best Published Paper Award in Economic, Social and Administrative Sciences. They will receive the award at the APhA Annual Meeting and Exposition in April.

Their paper, "Evaluation of the Iowa Medicaid Pharmaceutical Case Management Program." was published in the Vol. 44, number 3 issue of the *Journal of the American Pharmaceutical Association* in 2004.

APhA Community Pharmacy Residency Excellence in Precepting Award: Jay D. Currie, Pharm.D., director of the Community Pharmacy Practice Residency Program, is the recipient of the 2005 APhA Community Pharmacy Residency Excellence in Precepting Award. This national award by the American Pharmacists Association was given to Currie for his influence on residents and the residency program, promotion and advocacy of community pharmacy residency education and training, innovative practice and scholarly activities, and leadership and community service. It will be presented at the 2005 APhA Annual Meeting during the Community Pharmacy Residency Networking Reception.

Guillory Teaching Award: Praveen Mudunuri, a graduate student in pharmaceuticals, is the fall semester 2004 recipient of the Guillory Graduate Student Teaching Award. The award was established by Keith Guillory, Ph.D., professor of pharmaceuticals, to recognize outstanding teaching by a pharmaceuticals teaching assistant in the Pharmacy Practice Laboratory each semester. The awardees receive a certificate and a check for \$1,000. This recipient was chosen by the instructors in the four-semester course, Jeff Reist, B.S., instructor, and Lucinda Harms, B.S., R.Ph., clinical instructor, both clinical and administrative pharmacy, with input from the students.

Dozens of alumni, faculty, staff and students kicked up their heels at the College of Pharmacy's Ball 2005. The annual event, held at the Lodge in Bettendorf, Iowa, included dinner, dancing, and door prizes.

Students join diabetes education effort

UI pharmacy students are part of a national effort aimed at increasing awareness of diabetes. Throughout the spring they will be offering free blood glucose screenings at area pharmacies. "Operation Diabetes" was launched by the American Pharmacists Association Academy of Student Pharmacists (APhA-ASP) and is sponsored by Rite Aid. In addition to providing glucose screening, the promotional campaign is designed to increase awareness of diabetes and the dangers associated with the disease.

Twenty-one UI pharmacy students were trained by pharmacist Jen Musick of Iowa Health Solutions to administer the blood glucose screenings. Anyone identified as having high blood glucose levels will receive information for referral to their physicians.

Erin Robinson, P2, performed a free glucose screening at Osco Drug.

New Faculty Profile

Laurie Schenkelberg

Laurie L. Schenkelberg ('98 Pharm.D.) joined the UI College of Pharmacy as assistant professor of clinical and administrative pharmacy in December. As a mentor for Pharm.D. students, she is also a resource for the residency program, meeting with students on campus throughout the day to do topic discussions and patient presentations.

"The University of Iowa's College of Pharmacy is a very strong program," said Schenkelberg. "I am excited for the opportunity to be a member of the faculty and to contribute to the students' education."

Schenkelberg commutes between Iowa City and her home in Des Moines, where she holds a position as a clinical pharmacist for the East Des Moines Family Care Center. There she cares for the clinic's inpatients with a team of physicians, while also seeing patients in the clinic to manage their disease states and medication therapies.

"It is challenging to have commitments to both the University and the clinic, but I have been in a position like this in the past that has helped me to learn how to balance the responsibilities," said Schenkelberg.

After graduation, the Odebolt, Iowa native completed a Pharmacy Practice Residency at University of Iowa Hospitals and Clinics.

"I have always enjoyed the sciences and working closely with people," said Schenkelberg. "Pharmacy seemed like the perfect career for me because of the heavy science component and the prospect of working closely with practitioners and patients. My advice to students is to take pride in your profession, get involved, and keep in mind that hard work can achieve anything."

Schenkelberg noted that a shift in patient care is the biggest difference she has experienced since she was a pharmacy student. "Today's pharmacists are getting more directly involved in patient care," said Schenkelberg.

Alumni Profile

Name: Tom Halterman, R.Ph.
Year of Graduation: B.S. Pharm 1989
Residence: West Des Moines, Iowa
Current Position: Chief Executive Officer,
Outcomes Pharmaceutical Health Care

Tom Halterman

What interested you in pursuing a career in pharmaceutical care?

In 1999, I partnered with a handful of other motivated Iowa pharmacists to start Outcomes Pharmaceutical Health Care. Our vision was to create a business that would pay pharmacists for services they provide with their heads rather than their hands. My partners and I believed that pharmacists, positioned with the right tools, could improve health care quality and control costs. Today Outcomes covers over 1.3 million people nationwide with participating pharmacists in 48 states. We can be found on the Web at getoutcomes.com.

What's a typical day at work for you like?

My daily activities are all focused toward getting more pharmacists to deliver Medication Therapy Management Services to more patients, in more areas of the country, and providing payment for the delivery of such services. To accomplish this I may meet with current or prospective clients, review contracts, coordinate with staff members, or a bevy of other activities to advance our organization's mission.

What is the biggest change you've experienced in the field since you were a student at the UI?

Several important changes have occurred within the profession since I was a student, including the pharmaceutical care movement and patient counseling laws. However, the Medicare Part D Prescription Drug Benefit has the potential to radically (and positively) transform the profession. The coverage of Medication Therapy Management Services within Part D offers pharmacists the chance to take a quantum leap forward as valued health care professionals. Whether or not the profession will respond remains to be seen.

What one piece of advice you would give to today's pharmacy students?

I would stress to them the value of developing mentoring relationships with people they respect—both from inside and outside of the profession. I would also tell them the same philosophy I learned from my mother, which dates back to my days as a high school baseball player—when you get in a jam or a pressure situation, just throw strikes! Everything else will just fall into place.

Tom Halterman is the College's Alumni Board President for 2005. Read his first column to alumni on page 7.

Remembering reunions past. Members of the class of 1959 and their spouses get reacquainted. Left to right: Patricia and James Nelson of Winterset, Iowa, Rhea (Ressler) and Douglas Talley of Sun City, Ariz., and Robert and Sue Astine, of Macomb, Ill.

Join the reunion fun

On June 10 to 12, 2005, the University will celebrate the classes of 1945, 1950, 1955, 1960 and 1965. Although these classes have reached milestone anniversaries, everyone is invited back to help the College commemorate its 120th anniversary.

On Saturday, June 11 from 9 -11 a.m., meet up with old friends at a continental breakfast in the Banker Student Activity Center. Students will be available to lead tours of the Wurster Building. A special exhibit covering the past 12 decades will show advances in the science of pharmacology, significant achievements, and the people who have made the UI College of Pharmacy an international leader. Photos of eras gone by, along with some of the 'tools of the trade,' will be just a few of the images in this historic look back.

That evening, please join fellow alumni, faculty, and staff for dinner at the Holiday Inn in Coralville. Share your best memories from your time at the University. Enjoy an evening reminiscing and catching up on new happenings.

To find out the other reunion activities at the UI on Alumni Weekend, or to register, go to <http://www.iowalum.com/reunions/arw/index.html> or phone the University of Iowa Alumni Association at 319-335-3294 or 800/IOWALUM (469-2586). If you're interested in helping to encourage your class to get back to campus, contact Vicki Wittenberg at the College of Pharmacy either at vicki-wittenberg@uiowa.edu or 319-355-8780.

For you're looking ahead, Reunion Weekend 2006 is June 9-11, when the College will honor the classes of 1946, 1951, 1956, 1961 and 1969. It's never too early to start making plans with friends for next year!

Maier's gift supports students

Edward L. Maier ('70 B.S.) has made a generous bequest gift through the University of Iowa Foundation for the UI College of Pharmacy Opportunity Fund, which provides valuable, unrestricted resources for the College.

"Ed Maier's generosity reflects his tremendous commitment to the young people of The University of Iowa and helps us continue to make it possible for qualified students to pursue their pharmacy educations," said Jordan Cohen, dean. "As college costs continue to rise, these types of gifts can make the difference between being a good college and a great college, and we deeply appreciate Ed's support."

Maier, who returned to his hometown of Mapleton, Iowa, after graduating from the UI, has been in the pharmacy business for more than 40 years. He worked at Griffin

Pharmacy in high school, and after completing his UI pharmacy degree, returned to work as a pharmacist there, eventually buying the business in 1981 and changing the name to the Maier Family Pharmacy in 1992. He is active in his community and serves on numerous professional boards.

Maier's gift will help the College fulfill its \$9.2 million fund-raising goal, which is part of the UI's \$1 billion comprehensive campaign. *Good. Better. Best. Iowa: The Campaign to Advance Our Great University* runs through 2005 and is being conducted under the guidance of the UI Foundation.

For information about how to give, contact Mary Rettig, the UI Foundation's director of development for the college, at maryrettig@uiowa.edu or at 319-335-3305 or 800-648-6973. To make a gift online, go to www.uifoundation.org/pharmacy.

In Memoriam

Donald P. Hayes ('50 B.S.), of Tucson, Ariz., died Feb. 6, 2005. Born in Elwood, Iowa, he had a 41-year career in the pharmaceutical and health care industries. During his career, Hayes and his family moved from Arizona to California to Michigan to New Jersey. In 1991, he and his wife, Joy, retired in Tucson. They were active in the Catalina Foothills Church. He was a member of the board of trustees of Evangelistic Projects International. In addition to his wife, Hayes is survived by two sons, one daughter and their families.

Duane T. Johnson ('54 B.S.) of Fallon, Nev., died at his home in Marion, Iowa on June 1, 2004, after a long fight against malignant melanoma. He was a member of RhoChi. He was employed in Cedar Rapids at Paramount Pharmacies and Drug Town, until relocating to Nevada where he retired from Raleys Food and Drug. He then worked for Wal-Mart and was still engaged in his love of pharmacy until his death. He is survived by his wife of 47 years, Miona Marie, five children, and six grandchildren.

Jerome Darryl "Jerry" Karbeling, of Polk City, Iowa, died January 28, 2005 at Iowa Methodist Medical Center. He was senior vice president for public affairs and corporate development for the Iowa Pharmacy Association and a community pharmacist and owner of Big Creek Pharmacy in Polk City, Iowa since 1977. Karbeling also served as an adjunct faculty member for UI College of Pharmacy and adjunct associate professor of pharmacy at Drake University. He was a past president of the Iowa Pharmacy Association and the Iowa Pharmacy Foundation. He served as the chair of the American Pharmaceutical Association Political Action Committee and in 1997 received the APhA Good Government Pharmacist of the Year Award. He chaired and served on numerous APhA policy and special committees and was a long time House of Delegates member. Karbeling was the recipient of the Bowl of Hygeia, and numerous community and civic leadership awards.

He is survived by his wife, Margaret, and daughter, Sara, parents Emanuel and Flora Karbeling of Potomac, Md., three brothers, and many nieces and nephews.

Alumni News

Richard Wenzel ('93 B.S., '98 Pharm.D.) received the 2005 *Pharmacy Today* One-to-One Counseling Award from the American Pharmacists Association. Wenzel, who also serves as a preceptor in the College, works in the Diamond Inpatient Headache Unit at St. Joseph Hospital in Chicago.

The APhA *Pharmacy Today* One to One Counseling Recognition Program is endowed by a grant from Johnson & Johnson – Merck. Each year, it honors five pharmacists who have gone above and beyond the call of duty in one-to-one patient counseling. A panel of 10 judges, including members of the *Pharmacy Today* Editorial Advisory Board, choose five recipients.

Pharmacists who receive recognition will have performed exemplary one-to-one counseling, resulting in better health, superior communication, and improved outcomes for their patients.

Matt Osterhaus ('80 B.S.) will receive the 2005 APhA-APPM Distinguished Achievement Award in Community and Ambulatory Practice. Osterhaus is president of Osterhaus Pharmacy in Maquoketa, Iowa, and a preceptor for UI pharmacy students. The award recognizes the achievements of an individual who has made significant contributions to the provision of pharmaceutical care within the community and ambulatory practice setting.

Dawn (Marcellus) Whitehill ('01 Pharm D.), of Tea, S.D., announces the birth of her son, Dallon Trent Whitehill, on Nov. 29, 2004.

Traviss A. Tubbs ('01 Pharm. D.) reports the arrival of Jackson Allen, born on Feb. 25. He joins his older sister, Caitlynn Ann, 21 months old.

College adds alumni affairs coordinator

Vicki Wittenberg

Since joining the UI College of Pharmacy in December 2004, Vicki Wittenberg has been eager to put her communication and networking skills to use as alumni and public affairs coordinator.

Wittenberg describes her role as working with, and for, the alumni. "We'd like to get more alumni involvement in our events and also keep them more connected with the College," said Wittenberg. "I'll also be working some with student groups and help with other projects as needed."

Wittenberg graduated in 1995 from Coe College in Cedar Rapids with a degree in speech and public relations and a minor in biology. She went on to work for just over two years doing ad design and layout before taking a position as assistant to the director of alumni programs at Coe College. "I worked at Coe for six years doing a variety of tasks," said Wittenberg. "It was an opportunity to expand on what I knew and head in a direction that seemed interesting to me. I worked with students and organized alumni events in and out of state, including homecoming, June reunion, and our golf outing fundraiser."

As alumni and public relations coordinator, Wittenberg looks forward to the challenge of building up the alumni program at the College. "I've got people here at the College and the Foundation providing me with strong backing," she said. "There has also been great response from the alumni wanting to help."

In the future, Wittenberg hopes to organize a range of events for alumni. "My goal is to help alumni, and prospective alumni, feel a connection to the College, no matter how far away they are physically," she said. "They need to know that they are appreciated for what they do for the College as well as the institution of pharmacy." Wittenberg hopes to travel to other areas such as Washington D.C. and Chicago to meet alumni.

Wittenberg currently is working with a committee to plan the grand opening of the new pharmacy in Student Health. In addition, she is planning an alumni event this summer at the Register's Annual Great Bike Ride Across Iowa (RAGBRAI).

"I really enjoy getting to know the alumni and students," said Wittenberg. "I like seeing the hard work that has been put into the events pay off. It's a good feeling to know that what I've done, or help do, made someone's day better or made their experience a little richer."

Wittenberg enjoys spending time with friends and her dogs. She also enjoys horseback riding, volleyball, tennis and rollerblading.

Students learn about legislative process

A group of pharmacy students spent a day in the Iowa state capitol to offer health screenings to state officials and to learn about the legislative process at the Iowa Pharmacy Association's annual legislative day on Feb. 16.

UI pharmacy students offered screening tests to Des Moines officials.

Seventeen of the students, who are UI representatives of the American Pharmacists Association/Academy of Student Pharmacists, offered glucose testing, blood pressure checks, bone density screenings and a new program on heartburn awareness at stations set up outside the governor's office.

IPA's legislative day focuses on legislation and regulatory issues facing the pharmacy profession in Iowa. Students heard discussions about the impact that pending legislative initiatives have on health care and the practice of pharmacy, as well as national health care policy issues.

Katy the Kangaroo, accompanied by P1 Kierstan Hanson, discussed medication safety with some of her "kids" at Roosevelt Elementary School in Iowa City, Iowa.

Report from your new alumni board president

By Tom Halterman
Alumni Board President

Admit it. As the closing seconds of this year's Capitol One Bowl Game ticked away, things looked pretty dark for the Hawkeye Nation — until suddenly Drew Tate and Warren Holloway hooked up for an improbable touchdown that will be remembered as one of the great endings in Hawkeye football history.

While fans will remember that moment for a long time, few will consider the countless hours of preparation these athletes put in to be ready when their time came. This victorious moment was years in the making.

For the profession of pharmacy, things looked pretty dark in 2003 as Congress debated the new Medicare Modernization Act and creation of the Medicare prescription drug program. Our few remaining cash patients were about to be gobbled up by pharmacy benefit managers, discount cards, mail order, and other things that go bump in the night. However a tiny provision in this enormous piece of legislation stands to elevate the profession to new heights.

This tiny provision calls for the coverage of "Medication Therapy Management" as part of the Medicare Part D prescription drug benefit. Medication Therapy Management (MTM) is a term coined by our elected officials to describe services which may be provided by pharmacists to assist individual patients to achieve optimal therapeutic out-

comes from drug therapy. The Act requires coverage of MTM beginning in 2006.

MTM holds the potential to transform pharmacy from a product commodity-based business into a true health care service-based business. Imagine being paid for your time and expertise, rather than just for the products you sell. Medicare Part D could represent a quantum leap forward for professional pharmacists' services.

Undoubtedly, we will have company/competition for the right to deliver these services—nurses, case managers, and others will all be at the table to grab a piece of this pie. However, only pharmacists possess the community access, drug therapy expertise, and prescriber relationships needed to deliver the maximum value from MTM.

Like Drew Tate and Warren Holloway, will our profession be ready when our time comes?

Late last year, responding to Center for Medicare and Medicaid Services' call for MTM best practice models, the Community Care Rx Medicare discount card initiated an MTM program. As a result of this action, over 300,000 seniors nationwide are now covered for a variety of MTM services, including Comprehensive Medication Reviews, Patient Education & Monitoring, Compliance Management, and OTC Consultations.

To date, thousands of payable MTM service claims have been submitted by pharmacists from around the country.

The data from these claims are striking:

- **For each \$1 paid to a pharmacist for MTM, an estimated \$10.17 has been avoided in additional health care costs.**
- **Over 80 percent of the drug therapy problems identified were resolved via consultation with the prescribing physician.**
- **Over 20 percent of the drug therapy problems identified and resolved were deemed serious enough to potentially cause a hospitalization or life-threatening situation if left unaddressed.**

While the early results are impressive, more pharmacist participation is needed. It will take much more than a bundle of claims from a handful of pharmacists to sway the decision-makers in D.C., Des Moines, and elsewhere. The time is now for pharmacists across the country to make a big play.

The clock is running.

Tom Halterman is a 1989 graduate of the College of Pharmacy. He can be reached at thalterman@getoutcomes.com.

Time to tee off for students

Whether you're a duffer, a pro, or a fan of the 19th hole, you're invited to show your support of pharmacy education at the 4th annual Eggleston-Granberg Golf Classic on June 10. The event, which is co-sponsored by the Iowa Pharmacy Foundation, UI College of Pharmacy, and the Drake University College of Pharmacy, will be held at the Willow Creek Golf Course, 140 Army Post Road, West Des Moines, Iowa.

The event honors the contributions and commitment to pharmacy students by Max Eggleston and Boyd and Peg Granberg. All proceeds benefit scholarship funds for pharmacy students at the two institutions. Registration starts at 8:30 a.m. and ends at 9:50 a.m. Shotgun Start is 10 a.m. The Golf Classic ends with a social hour and prizes at 3 p.m. For more information please call 515-270-0713 or go to <http://www.iarx.org> to register.
